Subject: Air Equipment Status

AreaRAE total 10 in Region

AreaRAEs available have sensors for:

CO – we have 1, need to order 4-5 more sensors to install in RAE

SO2 – Need to order new SO2 sensors for all 5 locations if using RAE-Viper system (If not using Viper we have 2 ToxiRAE and 2 Draeger for SO2 that could work)

H2S – OK

VOC – OK

LEL – OK

O2 – OK

Do you folks want to use RAE Rad sensors or the other equipment Tom is working with?

We also have 6 MultiRAE PROs with CO, H2S , gamma; these could be utilized as well

We also have 2 ppb RAE
